ORDER NO.  
ARP2479

STEREO RECEIVER

# SX-311R

## SX-301

## SX-251R

## SX-201

SX-311R, SX-301, SX-251R AND SX-201 HAVE THE FOLLOWING :

Type	Model				Power Requirement	Remarks
	SX-311R	SX-301	SX-251R	SX-201		
KUC	○	○	○	○	AC120V only	
SD	○	—	—	○	AC110V, 120V-127V, 220V, 240V (switchable)	
KUC/CA	○	—	○	○	AC120V only	

- This manual is applicable to the following : SX-311R/KUC, SD and KUC/CA ; SX-301/KUC ; SX-251R/KUC and KUC/CA ; SX-201/KUC, SD and KUC/CA.
- For the following : SX-311R/SD and KUC/CA ; SX-301/KUC ; SX-251R/KUC and KUC/CA ; SX-201/KUC, SD and KUC/CA, refer to pages 33-41.
- KUC/CA type is identical to KUC type with French operating instruction. For all information except for the instruction, refer to KUC type.

## SX-311R/SX-301 SX-251R/SX-201

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

### WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5).

When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

## 1. SAFETY INFORMATION

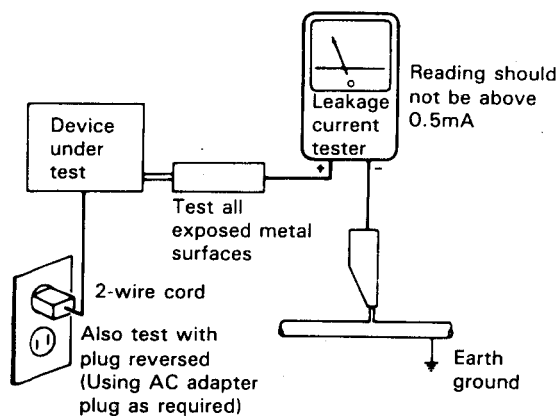

(FOR USA MODEL ONLY)

### 1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

#### LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.

AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

### 2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a  $\Delta$  on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

## 2. SPECIFICATIONS

### <SX-311R, SX-301>

#### Amplifier Section

Continuous Average Power Output is 70 watts\* per channel, min., at 8 ohms from 20 Hertz to 20,000 Hertz with no more than 0.8% total harmonic distortion.\*\*

Continuous Power Output (both channel driven)**	70 W + 70 W
20 Hz / 20 kHz, T.H.D. 0.8%, 8 $\Omega$	
Dynamic power output (with EIA test signal)	145 W/130 W/90 W
2/4/8 $\Omega$	
Input (Sensitivity/Impedance)	
PHONO	2.5 mV/47 k $\Omega$
CD, VCR/LD, TAPE 1/DAT, TAPE 2	150 mV/22 k $\Omega$
Phono Overload Level (T.H.D. 0.01%, 1 kHz)	
PHONO	130 mV
Output Level	
TAPE REC	150 mV/2.2 k $\Omega$
Frequency Response	
PHONO (RIAA Equalization)	20 Hz to 20,000 Hz $\pm 0.5$ dB
CD, VCR/LD, TAPE 1/DAT, TAPE 2	10 Hz to 70,000 Hz $\pm 0.5$ dB
Signal-to-Noise Ratio (IHF, short circuited, A network)	
PHONO	72 dB
CD, VCR/LD, TAPE 1/DAT, TAPE 2	96 dB
Graphic Equalizer frequency band	100 Hz, 330 Hz, 1 kHz, 3.3 kHz, 10 kHz, $\pm 8$ dB

#### FM Tuner Section

Frequency range	87.5 MHz to 108 MHz
Usable Sensitivity	12.3 dBf, IHF (1.1 $\mu$ V/75 $\Omega$ )
50 dB Quieting Sensitivity	
MONO	16.8 dBf (1.6 $\mu$ V/75 $\Omega$ )
STEREO	38.6 dBf (19.5 $\mu$ V/75 $\Omega$ )
Signal-to-Noise Ratio	
MONO	73 dB (at 85 dBf)
STEREO	70 dB (at 85 dBf)
Distortion	
STEREO	0.3% (1 kHz)
Alternate Channel Selectivity	50 dB (400 kHz)
Stereo Separation	35 dB (1 kHz)
Frequency Response	30 Hz to 15 kHz ( $\pm 1$ dB)
Antenna Input	300 $\Omega$ balanced, 75 $\Omega$ unbalanced

#### AM Tuner Section

Frequency range	530 kHz to 1,700 kHz
When 10 kHz step	
(SX-311R only)	
When 9 kHz step	531 kHz to 1,602 kHz
Sensitivity	
IHF, Loop antenna	350 $\mu$ V/m
Selectivity	20 dB
Signal-to-Noise Ratio	50 dB
Antenna	AM Loop Antenna

#### Miscellaneous

Power Requirements	
U.S., Canadian models	AC 120 Volts, 60 Hz
(SX-311R only)	
Multi-voltage model	$\sim$ AC 110 V/120 V - 127 V /220 V/240 V (switchable), 50/60 Hz
Power Consumption	
U.S., Canadian models	250 W (UL), 335 VA (CSA)
(SX-311R only)	
Multi-voltage model	410 W
AC Outlet	SWITCHED x 1 : 100W MAX
Dimensions	
SX-311R	420 (W) X 140 (H) X 289 (D) mm 16-9/16(W) X 5-1/2 (H) X 11-3/8(D) in
SX-301	420 (W) X 135 (H) X 289 (D) mm 16-9/16(W) X 5-5/16 (H) X 11-3/8(D) in
Weight (without package)	5.8 kg (12 lb 13 oz)

#### Furnished Parts

FM Antenna	1
AM Loop Antenna	1
Operating Instructions	1
(SX-311R only)	
Remote control unit	1
Dry cell battery (size "AAA" (R03/UM-4))	2

\* Measured pursuant to the Federal Trade Commission's Trade Regulation rule on Power Output Claims for Amplifier.  
\*\* Measured By Audio Spectrum Analyzer.

NOTE:  
Specifications and design subject to possible modification without notice due to improvements.

### <SX-251R, SX-201>

#### Amplifier Section

Continuous Average Power Output is 50 watts\* per channel, min., at 8 ohms from 40 Hertz to 20,000 Hertz with no more than 0.8% total harmonic distortion.\*\*

Continuous Power Output (both channel driven)**	50 W + 50 W
40 Hz / 20 kHz, T.H.D. 0.8%, 8 $\Omega$	
Dynamic power output (with EIA test signal)	85 W/65 W
4/8 $\Omega$

### 3. EXPLODED VIEWS, PACKING AND PARTS LIST

#### NOTES:

- The parts with an encircled number are generally unavailable because they are not in our Master Spare Parts List.
- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

## NOTE

1. This P.C.B. connection diagram is viewed from the parts mounted side.
2. The parts which have been mounted on the board can be replaced with those shown with the corresponding wiring symbols listed in the following Table.
3. The capacitor terminal marked with ⊖ (double circles) shows negative terminal.
4. The diode terminal marked with ⊕ (double circles) shows cathode side.
5. The transistor terminal to which E is affixed shows the emitter.

P.C.B. pattern diagram indication	Corresponding part symbol	Part Name
Q504	 or 	Transistor
Q215	 or 	Radiator type transistor
D203		Diode
R237		Resistor
C513		Capacitor (Polarized)
C518		Capacitor (Non-polarized)

## Others

P.C.B. pattern diagram indication	Part Name
IC	IC
S	Switch
RY	Relay
L	Coil
F	Filter
VR	Variable resistor or Semi-fixed resistor

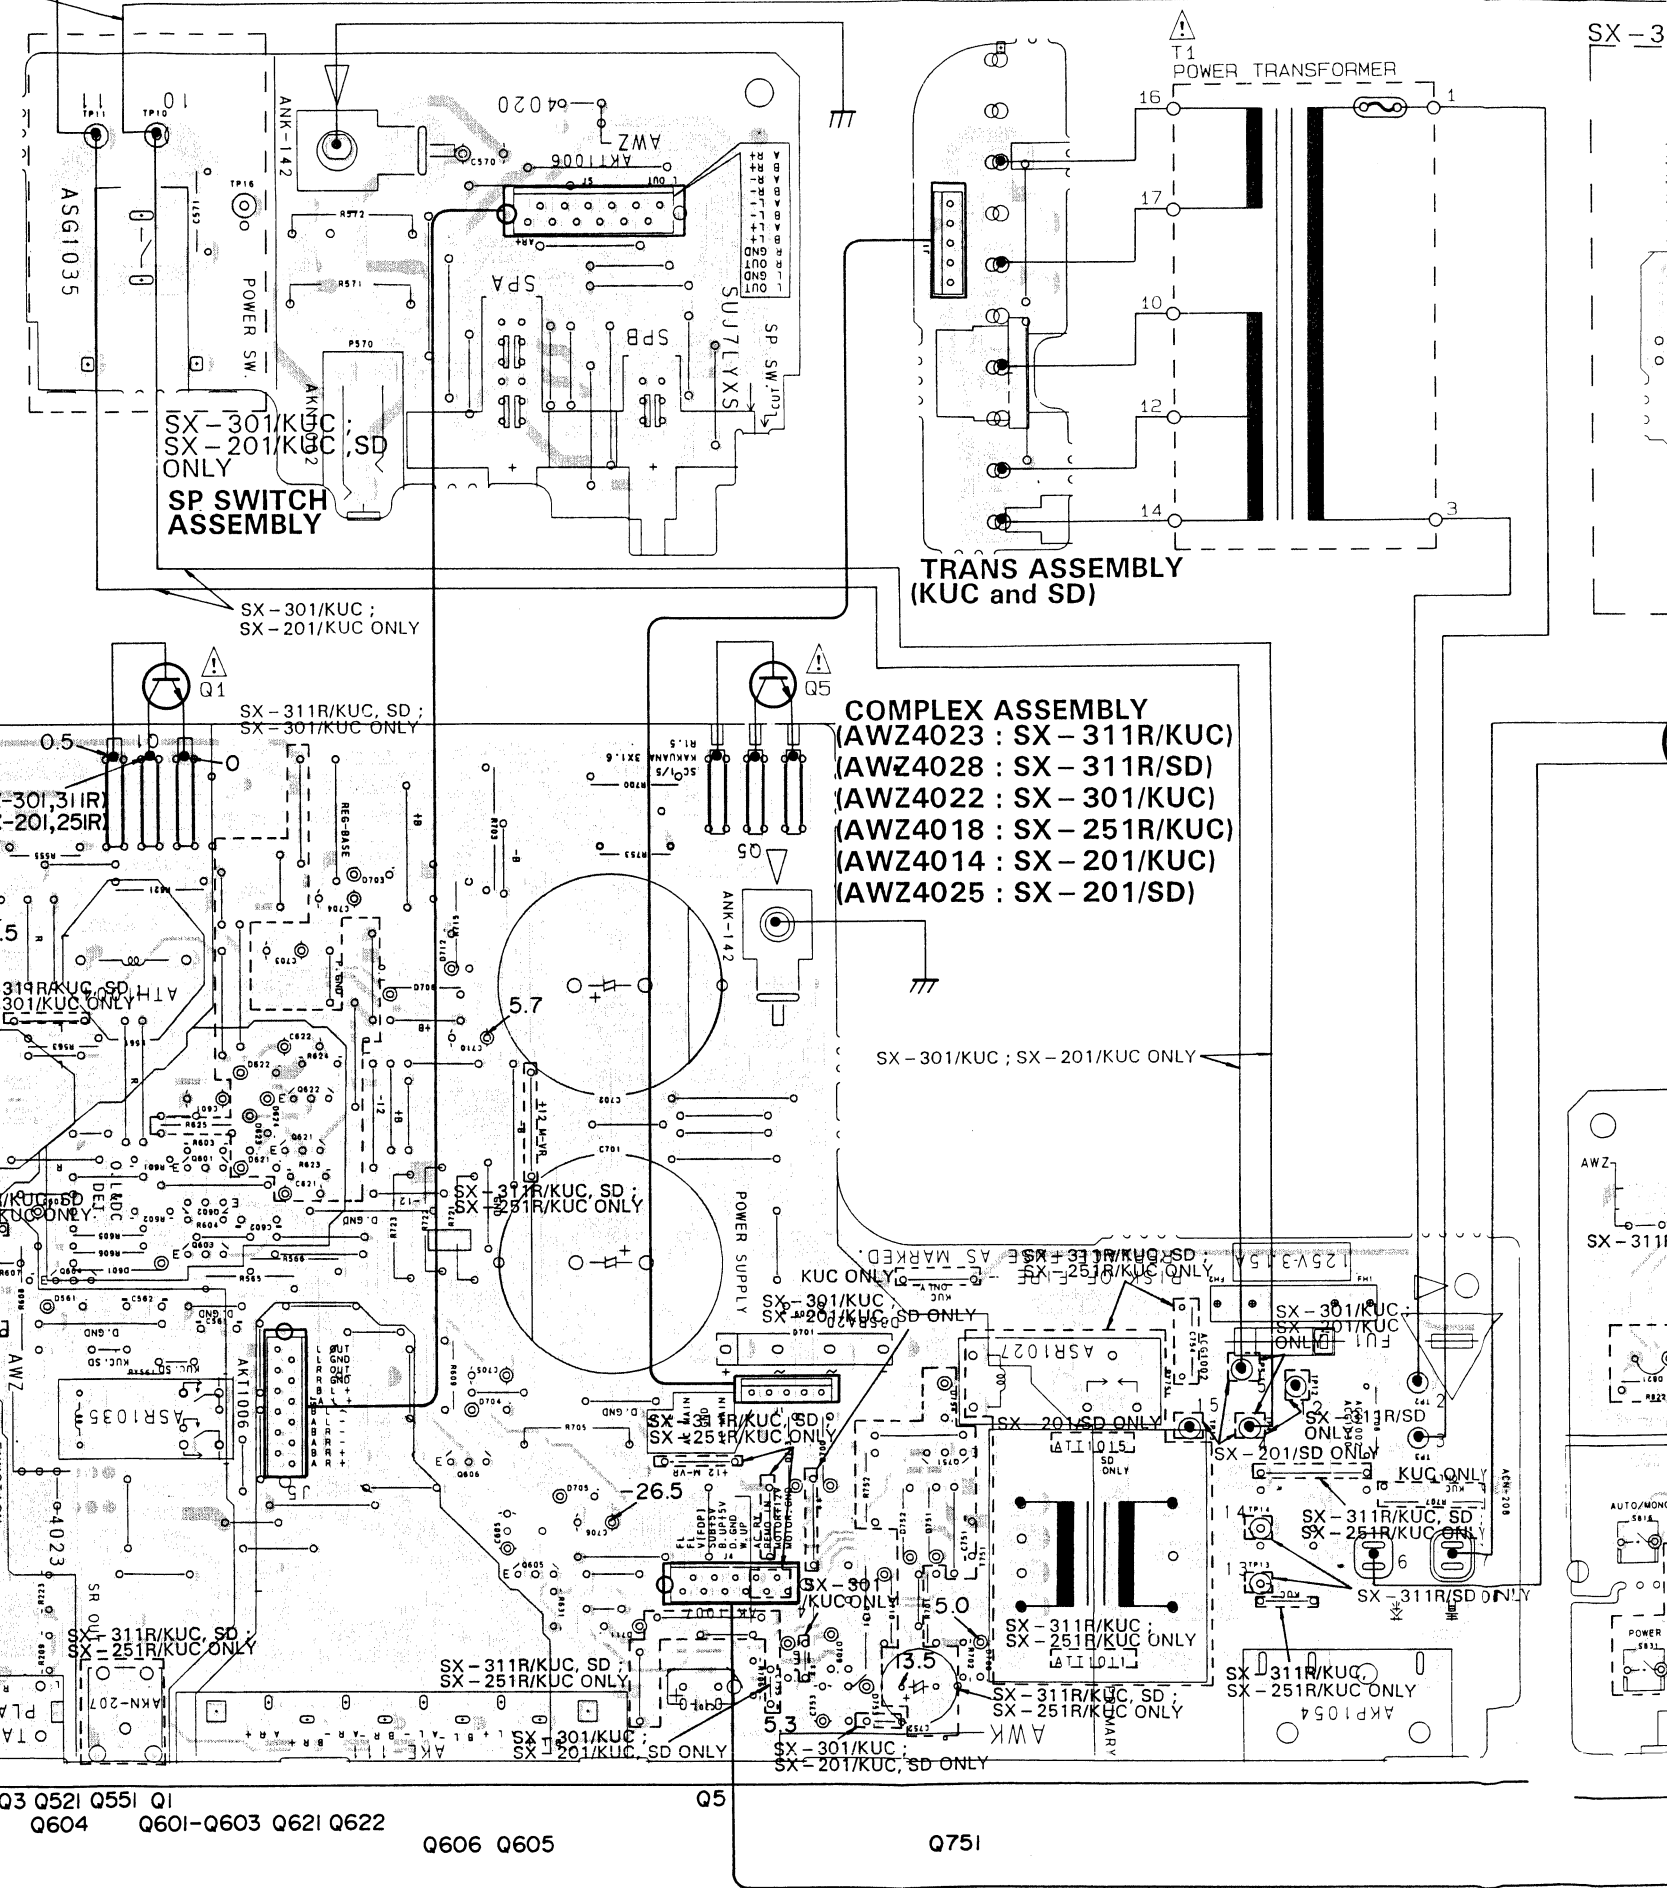

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on P.C.B. indicate that replacement parts must be of identical designation.

(POUR MODÈLE CANADIEN SEULEMENT)

Sur P.C.B., les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) indiquent que les pièces de remplacement doivent avoir la même désignation.

To COMPLEX assembly (1/2) (P15)

5. PCB PARTS LIST

- NOTES:
- Part without part number cannot be supplied.
  - Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
  - The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
  - When ordering resistors, first convert resistance values into code form as shown in the following examples.
- Ex. 1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).
- 560Ω 56 × 10<sup>1</sup> 561.....RD1/8PM□□□J  
47kΩ 47 × 10<sup>3</sup> 473.....RD1/4PS□□□J  
0.5Ω 0R5.....RN2H□□□K  
1Ω 010.....RS1P□□□K
- Ex. 2 When there are 3 effective digits (such as in high precision metal film resistors).
- 5.62kΩ 562 × 10<sup>1</sup> 5621.....RN1/4SR□□□□F

## VR ASSEMBLY

### SEMICONDUCTORS

IC361	MECHANISM DRIVER IC	TA8409S
Q361	TRANSISTOR	RN1201

### COILS

L361, 362	AXIAL INDUCTOR	LAU101K
-----------	----------------	---------

### CAPACITORS

C361	ELECTR. CAPACITOR	CEAS470M16
C362, 363	CERAMIC CAPACITOR	CKCYF473Z50
C364	CERAMIC CAPACITOR	CKCYX104M25

### RESISTORS

VR361	MOTOR VR WITH LED	ACX1070
	Other resistors	RD1/8PM□□□J

## TRANS ASSEMBLY

TRANS assembly has no service part.

## 6. ADJUSTMENTS

- For connections and points to be adjusted, refer to Fig. 6-1, Fig. 6-2 and Fig. 6-3.

### 6.1 AM TUNER ADJUSTMENT

- Set the BAND selector "AM".

Step No.	Adjustment Title	AM SG (400Hz 30% Mod.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (kHz)	Level (dB $\mu$ V)			
1	TUNED indicator sensitivity check	1000	—	1000kHz	R117	Check that the indicator lights up when the level is less than 64dB $\mu$ V/m. *1

\*1. Remove R117 if the indicator does not light up.

### 6.2 FM TUNER ADJUSTMENT

- Set the BAND selector to "FM".
- Perform VCO adjustment two minutes or more after turning the power ON.

*Note :*

*Stereo modulation : Main 1kHz L+R  $\pm$  68.25kHz dev.*

*Pilot 19kHz  $\pm$  6.75kHz dev.*

Step No.	Adjustment Title	FM SG (1kHz $\pm$ 75kHz dev.)		Reception Frequency Display	Adjustment Location	Specifications
		Frequency (MHz)	Level (dB $\mu$ V)			
1	Detector coil T-meter adjustment	98.0	60	98.0MHz	L101	Adjust so that the DC voltage between both sides of R111 is 0 $\pm$ 50mV.
2	Separation check	98.0	60	98.0MHz	R121 *1	Check that the separation is 23dB or more (at 1kHz).
3	TUNED indicator sensitivity check	98.0	20 $\pm$ 13	98.0MHz	R113 *2	Check that the indicator lights up.

\*1. Remove R121 if the separation is less than 23dB.

\*2. Remove R113 if the indicator does not light up.

## 7. FOR SX-311R/SD, KUC/CA, SX-301/KUC, SX-251R/KUC, KUC/CA, SX-201/KUC, SD AND KUC/CA TYPES

- KUC/CA type is identical to KUC type but with additional (French) operating instructions :

Model Name	Operating Instructions (French)
SX-311R/KUC/CA	ARC1348
SX-251R/KUC/CA	ARC1348
SX-201/KUC/CA	ARC1348

### 7.1 CONTRAST OF MISCELLANEOUS PARTS

#### NOTES:

- Part without part number cannot be supplied.
- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

SX-311R/SD, SX-301/KUC, SX-251R/KUC, SX-201/KUC, SD and SX-311R/KUC have the same construction except for the following :

Mark	Symbol & Description	Part No.						Remarks
		SX-311R/ KUC type	SX-311R/ SD type	SX-301/ KUC type	SX-251R/ KUC type	SX-201/ KUC type	SX-201/ SD type

\*1 : SP SWITCH assemblies of SX-311R/KUC, SD and SX-251R/KUC types are the same.

SP SWITCH assemblies of SX-301/KUC, SX-201/KUC and SD types are the same.

\*2 : 9k/10k assemblies of SX-311R/SD and SX-201/SD types are the same.

\*3 : VR assemblies of SX-311R/KUC and SD types are the same.

\*4 : For Channel step selector.

## ● CONTROL ASSEMBLY (AWZ4082, AWZ4015, AWZ4026)

CONTROL assembly (AWZ4082, AWZ4015, AWZ4026) and CONTROL assembly (AWZ4019) have the same construction except for the following :

Mark	Symbol & Description	Part No.				Remarks
		AWZ4019	AWZ4082	AWZ4015	AWZ4026	
	Q802	RN2201	RN2201	.....	.....

	S1	.....	ASG1035	
△	C571 (0.01/AC400V)	.....	ACG1002	

## 7.2 PCB PARTS LIST

### NOTES:

- Part without part number cannot be supplied.
- Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- The △ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex. 1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

560Ω    56 × 10<sup>1</sup>    561.....RD1/8PM 5 6 J  
 47kΩ    47 × 10<sup>3</sup>    473.....RD1/4PS 4 7 J  
 0.5Ω    0R5.....RN2H 0 5 K  
 1Ω    010.....RS1P 0 1 0 K

Ex. 2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62kΩ    562 × 10<sup>1</sup>    5621.....RN1/4SR 5 6 2 F

**9k/10k ASSEMBLY (SX-311R/SD, SX-201/SD)**

**SWITCH**

S999	SWITCH	ASE-028
------	--------	---------

## 8. PANEL FACILITIES

- The illustration shows SX-311R multi-voltage model.

### ① POWER (STANDBY/ON) switch

(SX-311R, SX-251R)

STANDBY indicator

(SX-311R multi-voltage model only)

This is the switch for electric power.

**ON:** When set to the ON position, power is supplied and the unit becomes operational.

**STANDBY:** When set to the STANDBY position, the main power flow is cut and the unit is no longer fully operational. A minute flow of power feeds the unit to maintain operation readiness.

- The accessory remote control unit can also be used to operate STANDBY/ON.

[For SX-311R multi-voltage model]

Even when the power is in STANDBY, the STANDBY indicator remains lit.

**NOTE:**

When the power is initially turned ON, muting will be applied to prevent sound from being output for approx. 5 seconds.

### ① POWER ( OFF, ON) switch

(SX-301, SX-201)

When this switch is pressed, power is supplied to the unit. Press the switch again to turn power OFF.

[Timer ON/OFF possible]

When the unit is switched ON, ON/OFF control can be performed by means of the optional timer.

**NOTE:**

When the power is initially turned ON, muting will be applied to prevent sound from being output for about 5 seconds.

### ② PHONES jack

Connect the plug on your headphones to this jack. To listen to a program through the headphones, set both SPEAKERS A and B switches to the OFF position.

### ③ SPEAKERS ( OFF, ON) buttons

These are used to select the speaker through which you wish to listen.

**A:** When the speakers connected to A terminals are in use.

**B:** When the speakers connected to B terminals are in use.

- Turn both A and B speakers to OFF position when only the headphones are in use.

**NOTE:**

No sound will be heard through the speakers when both A and B buttons are depressed if only one set of speakers has been connected to either A or B SPEAKERS terminals.

### ④ STATION CALL buttons

These buttons are used to preset and recall desired broadcasting stations.

### ⑤ TAPE 2 MONITOR button

Press when listening to tape playback with the cassette deck 2.

### ⑥ Function buttons

Use to select playback source.

**[TAPE 1/DAT]** — Press when listening to tape playback with the cassette deck 1 or digital audio tape deck.

**[VCR/LD]** — Press when listening to programs from a component connected to the VCR/LD terminals.

**[CD]** — Press when listening to compact disc playback with a CD player.

**[TUNER]** — Press when listening to AM or FM broadcasts with a tuner.

**[PHONO]** — Press when listening to record playback on a turntable.

### ⑦ MEMORY button

When the unit is in the frequency display mode, pressing this button will result in the memorization of the current broadcast band, reception frequency, and FM AUTO/MONO mode.

This button is also used to input custom memory names.

### ⑧ MEMORY SCAN button

This button is used for both station memory scan and custom memory scan.

### ⑨ BAND Selector buttons

These buttons are used to select either AM or FM reception.

### ⑩ CUSTOM MEMORY buttons

Stations can be assigned to STATION CALL buttons according to the genre of material broadcast (POP, ROCK, OTHER). You can recall a particular genre, and scan all the stations of that genre with Memory Scan until you reach the desired one.

### ⑪ RETURN button

This is helpful during troubleshooting or when no sound is output. Pressing this button returns the receiver to the following settings, the sound level being controlled by VOLUME control.

- TAPE 2 MONITOR OFF
- FUNCTION TUNER
- BAND FM\*

\* The last FM broadcast you were listening to will be received. When reception is not possible, search begins for frequency that can be received.

#### NOTE:

If no sound is output after the RETURN button is pressed, make sure that SPEAKERS switches are turned on.

### ⑫ TUNING buttons (–, +)

+: The FM or AM band is scanned in the direction of increasing frequency.

–: The opposite operation to that of the UP button takes place.

### ⑬ BALANCE control

Should normally be left in the center position. Adjust balance if the sound is louder from one of the speakers. If the right side is louder, turn toward the L position and if the left side is louder, turn toward the R position.

### ⑭ VOLUME control

Use to adjust volume level.

### ⑮ GRAPHIC EQUALIZER controls

The equalizer is divided into five frequency ranges (100 Hz, 330 Hz, 1 kHz, 3.3 kHz, 10 kHz) to tailor music to the individual taste of the listener.

### ⑯ OPERATION DISPLAY panel

- Indicates the function or frequency by the function switches.
- TUNED indicator
- FM STEREO indicator
- FM MONO indicator
- TUNING AUTO/MANUAL indicator
- DIRECT ACCESS tuning indicator
- CUSTOM MEMORY indicator
- Indicates channel, STATION CALL number or sleep time.
- SEARCH indicator
- SCAN indicator
- MEMORY indicator
- TAPE 2 monitor indicator.

### ⑰ DIRECT ACCESS tuning button

When this button is pressed, the STATION CALL buttons function as ten-key number buttons for direct input of the desired reception frequency. Press again to cancel this mode.

If the input station falls outside of the receiver's tuning range, the display section will display a message: "UPPER" if the frequency is too high and "LOWER" if it is too low.

### ⑱ Remote sensor window

(SX-311R, SX-251R models only)

### ⑲ HITS button

- Works during FM reception.
- If the HITS button is pressed during input of numbers for DIRECT ACCESS tuning, the receiver sets the remaining digits which have not yet been input to "0", searches for the corresponding frequencies, and stops on the first station it finds.
- If the HITS button is pressed at the currently displayed station frequency, the receiver searches up and down the frequency band for the next station (the SEARCH indicator in the display section lights at this time) and stops at the first one it finds.

(FM)

#### NOTE:

- The system searches for stations within successive 1 MHz ranges for FM. During DIRECT ACCESS tuning, it searches up and down for a station until it reaches the edges of the band. If no receivable station is found within the band range, the receiver returns to the state it was in before the HITS button was pressed.
- If the upper (or lower) frequency limit of the receiver is encountered during HITS operation, the receiver stops searching in that direction but continues to search in the other.

### ⑳ FM TUNING AUTO/MANU button

Works during FM reception.

Use this button to select either the AUTO mode or the MANUAL mode.

When the "AUTO" indicator is lit, the receiver is in the AUTO mode.

### ㉑ FM MODE AUTO/MONO selector button

Use to select the auto stereo mode or monaural mode when listening to FM broadcasts. The monaural mode has been selected when the FM MONO indicator is lighted.

#### Auto stereo mode:

Normally leave in this mode for reception. When a stereo FM broadcast is received, it will be automatically reproduced in stereo sound.

#### Monaural mode:

When receiving distant stations or stations with weak broadcast signals, the input signal may be weak, thus resulting in increased noise during FM stereo broadcasts. In this event, setting the receiver to the monaural mode will reduce the noise. In this case, however, FM stereo broadcasts will be reproduced in monaural sound.

#### NOTE:

This button has no effect on reception of AM broadcasts.

# SX-311R/SX-301 SX-251R/SX-201

- The illustration shows SX-311R multi-voltage model.

## ① CHANNEL STEP switch

## ② FM/AM ANTENNA terminals

Use these antenna terminals for receiving FM and AM broadcasts.

## ③ INPUT jacks

PHONO ..... Connect to the output cables from a turntable.  
CD ..... Connect to the output jacks of a compact disc player.  
VCR/LD ... Connect to the output jacks of a video cassette recorder or LD player, etc.

## ④ TAPE 1/DAT jacks

Connect these jacks to the cassette deck or digital audio tape deck.

## ⑤ TAPE 2 jacks

Connect these jacks to the cassette deck.

## ⑥ CONTROL OUT jacks

(SX-311R, SX-251R only)

Connect this jack to other Pioneer components bearing the mark when using the remote control of this unit to control the other components.

## ⑦ SPEAKERS terminals

A: Connect to a first set speakers.

B: Connect to a second set of speakers.

### NOTE:

No sound will be heard through the speakers when both A and B buttons are depressed if only one set of speakers has been connected to either A or B SPEAKERS terminals.

## ⑧ GND terminal

Connect to the ground lead of a turntable.

Use a screwdriver to connect with the ground terminal.

## ⑨ VOLTAGE SELECTORS

(SX-311R, SX-201 multi-voltage models only)

## ⑩ Power cord

Connect to AC wall socket.

## ⑪ AC OUTLET

### AC OUTLET

[U.S. and Canadian models]

**SWITCHED 100 W MAX (0.8 A MAX)**

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Electrical power consumption of the connected equipment should not exceed 100 W (0.8 A MAX).

The equipment should be disconnected by removing the mains plug from the wall socket when not in regular use, e.g. when on vacation.

[Multi-voltage model]

**SWITCHED 100 W MAX**

Power supplied through this outlet is turned on and off by the receiver's POWER switch. Electrical power consumption of the connected equipment should not exceed 100 W. The equipment should be disconnected by removing the mains plug from the wall socket when not in regular use, e.g. when on vacation.

### CAUTION:

DO NOT CONNECT MONITOR OR TV SET.

### NOTE:

Do not connect appliances with high power consumption such as heaters, irons, or television sets to the AC OUTLET, in order to avoid overheating or fire risk.

This can cause the receiver to malfunction.
